

# Hinkley Point C Look ahead

October 2019

We continually monitor the light, noise and dust emissions from Hinkley Point C Site to ensure that our construction works have a minimal impact. However, you may still see and hear some aspects of the work. This is a summary of some of our current works:

Location		Description of works
1	Sewage Treatment Plant	Commissioning works continue with clean water testing underway, the next step will be to undertake biological tests.
2	Jetty	The temporary jetty is now operational so you can expect to see an increased number of vessels in the channel. Each vessel that delivers to the the jetty will alleviate 300 lorries using the local road network. The majority of aggregates used in the concrete mix are quarried in Somerset. Find out more <a href="#">here</a> .
3	Bunker 5	The first Liner Cup is due to be lifted into place using Big Carl (SGC-250 Crane) in October.
	Combwich Wharf	Further dredging works will take place in October at Combwich Wharf along with continued preparation works.
	Environment Team	The HPC Environment Team will be undertaking routine maintenance on the noise and dust monitors. The team are also working with Tier 1 contractor Kier Bam, the owner of the platform which sits closest to our immediate neighbours, to manage site lighting and prepare for winter working.
	Mud Management	We continually manage mud being taken off the site, and onto the public road network. A few of the ways we do this are as follows: <ul style="list-style-type: none"> <li>• Wheel wash facility at the South Plaza for HGV's</li> <li>• Mobile bus wheel wash</li> <li>• Wheel wash facility at individual platforms on site</li> </ul>
