

Hinkley Point C look ahead

December 2019

We carefully manage our works at Hinkley Point C, ensuring our construction activity has minimal impact on our neighbours. However, you may still see and hear some aspects of the work. This is a summary of some of our current works:

Location		Description of works
1	Sea Wall	Sea Wall construction is now complete with 308 wave return units installed. Pedestrian ramps have been installed so that at the back end of construction, and when it is safe to do so, the area behind the sea wall will be open for members of the public to walk along.
2	Cooling water pipes (land side)	The inlet water pipe system is now complete. Works are continuing on the outlet pipes with planned completion in 2020.
3	Bunker 1	Construction of Bunker 1 will continue in December. Like the other bunkers on site, it will be used to prefabricate key components in weatherproof conditions. Once the components are complete they will be lifted into place using our large crane, Big Carl.
4	Pump House	Work continues to construct the foundation for the Pump House on Unit 2.
5	Corallina Works	Works to protect the corallina on the foreshore are continuing.
	500 Apprenticeships	At the start of construction we set out an ambitious target to create 1,000 apprenticeships over the course of the project. Last month we hit a major milestone, with over 500 apprentices now working on the project.
	Pluggedin	Read the latest copy of Pluggedin, our Community Magazine, here .
Off Site	Combwich Wharf	The Enabling phase of works is continuing at Combwich Wharf. We would like to thank local residents for your patience whilst we took delivery of main fuel tanks, at the end of October. Find out more information on the delivery here .
